## KEY ACHIEVEMENTS

- Grew engineering from 3 to 80+ engineers, 10 into lead roles.
- Architected 450+ services exposing 3,000+ API endpoints.
- Priced and wrote proposals for engagements up to USD 138K+.

## EXPERIENCE

### Smarter.Codes

#### Chief Technology Officer

📅 Dec 2021 – Present

📍 Chandigarh, Hybrid

##### Commercial

- Owned the invoice ledger for the flagship engagement, 370+ invoices reconciled against delivered work.
- Built the per-product cost models the portfolio was priced from, with per-unit economics for the search chatbot, the bot platform and the document tooling.

##### Technical Leadership

- Ran a portfolio spanning regulated medical writing, healthcare messaging, e-commerce search and hospitality, serving 100K+ monthly actives in aggregate across client deployments.

##### Architecture

- Cut per-unit infrastructure cost by roughly 70%, re-architecting to a single multi-tenant frontend and consolidating cloud estate across AWS, Azure and GCP.
- Authored 180+ architecture models spanning 7,700+ components.

##### Organisation

- Directed 49 concurrent products in the company's busiest quarter.
- Led 45 of 83 delivery projects.
- Set the delivery agenda across the portfolio, raising 8,000+ of its engineering issues and writing 32,000+ comments on them.

##### Hiring and people systems

- Designed the company's engineering hiring funnel, a staged process taking 2,000+ candidates to 29 hires across ten role-specific boards.

##### AI Adoption

- Ran a ranked evaluation of nine agentic-tooling plans on cost, agentic allowance and consumption model, and proposed a five-licence controlled release ahead of any org-wide purchase.

**Tech Stack:** LLM and RAG pipelines, Kubernetes, AWS, Terraform

#### Program Manager

📅 Feb 2020 – Dec 2021

📍 Chandigarh, Hybrid

- Led five concurrent client engagements, contributing 2,200+ commits.
- Mentored the technical leads who took over product delivery.

**Tech Stack:** Apache Storm, StormCrawler, Kubernetes, Terraform

#### Full Stack Engineer

📅 Jun 2019 – Feb 2020

📍 Chandigarh, Hybrid

- Built the marketing AI website platform end to end.

**Tech Stack:** React, Node.js, MongoDB, Docker

## EDUCATION

### B.Tech, Mechanical Engineering

Indian Institute of Technology, Palakkad

📅 Aug 2015 – Jul 2019

## SKILLS & STRENGTHS

**Leadership:** Engineering Strategy, Organisational Scaling, Hiring and Technical Evaluation, Career Ladders, Delivery Management, Mentoring, Cross-functional Leadership

**Architecture:** Distributed Systems, SaaS Architecture, Microservices, Event-Driven Architecture, C4 Modelling, Architecture Decision Records

**AI:** LLMs, Agentic AI, RAG, Azure OpenAI, OpenAI API, LangChain, Prompt Engineering, Document Intelligence, Vector Search, NLP / NER, AI Evals, Guardrails, Multi-Agent Systems, GraphRAG

**Cloud and Platform:** AWS, Azure, GCP, Kubernetes, Docker, Terraform, CI/CD, Observability, SRE

**Engineering:** Java, Python, JavaScript/TypeScript, Node.js, React, SQL & NoSQL

**Commercial:** Proposals and Pricing, Cost Modelling, SOWs, Client Engagement

**Domains:** Legal AI, Healthcare AI, Finance AI, Regulated Medical Writing
